PKCT
PORT KLANG CRUISE TERMINAL

MAKE YOURSELF AT HOME

Malaysia's preferred home port.
Port Klang Cruise Terminal is a cornerstone of the country's maritime tourism, boasting three berths in a strategic location in Selangor Darul Ehsan.

Expansion
PKCT is poised for growth with an upcoming extension of its pier to significantly increase operational capacity.

Homeporting
Overnight stays and homeporting with esteemed cruise line partners have resonated strongly with local holidaymakers.

Partnerships
Strategic partnerships with operators like Resorts World Cruises, Royal Caribbean International and Carnival Group amplify PKCT's success.

SUSTAINABLE MARITIME INTERIORS

The Sustainable Maritime Interiors Declaration

ENVIRONMENTAL ADVOCACY

- 1 Champion responsible maritime interior architecture and design as a pathway to a sustainable future and contribute to giving our community an effective and united voice that drives meaningful action.
- 2 Be curious, seek wisdom and listen intently while advocating for positive change and encouraging others to follow through sharing knowledge and experiences.
- 3 Stimulate design-led innovation across the value chain and nurture partnerships that can accelerate sustainability gains through responsible consumption and production.

ENVIRONMENTAL ACTION

- 4 Approach every project with a healthy planet mindset, design conscientiously to protect natural resources and encourage all stakeholders to support better environmental choices.
- 5 Embrace and pursue circular design principles for longevity and flexibility, optimised material use, energy efficiency, waste reduction, designing for easy maintenance, repair and recycling.
- 6 Prioritise products and materials with strong, transparent and audited environmental performance data, especially those from suppliers that can demonstrate continuous sustainability improvement.

ENVIRONMENTAL FUTURE

- 7 Be bold and persistent in the pursuit of increasingly more sustainable interiors and be supportive of those who can help to advance these goals through transformative results.

SIEMENS

Ingenuity for life
Highly reliable and high-performance equipment
Solutions for all industries

Additive manufacturing
We deliver pragmatic additive manufacturing for all size companies. We enable end-to-end processes for additive manufacturing to make it easy, cost-effective and pervasive.

Artificial intelligence
By leveraging big data, our AI innovations and solutions enable smarter decision-making, greater efficiencies, improved quality, and faster time to market while unlocking new business.

Model based system engineering
Our integrated model-based system engineering (MBSE) methodology unifies all the domains needed to create today's smart systems and are all focused on accelerating product innovation or business success.

Comprehensive digital twin
Our digital twin is the single source of trust to enable smart decisions based on data. Only Siemens combines the real and digital worlds to build a true digital enterprise.

Sustainability
We create sustainable industrial innovation for a world we want to live in, today and tomorrow, and for an industry that desires to leave no trace on the planet.

Future of mobility
We are enabling the future of mobility on air, land and sea by helping create a transportation revolution to make travel more enjoyable and sustainable.

OUR PROCESS

Tudor Rose provides a complete advertisement design service.

Our process

If you have already developed a concept for your advertisement, we'll just need you to supply the appropriate text and image files, along with your guidance on how you would like these to be arranged. One of our skilled graphic designers will then prepare draft artwork for your review.

Alternatively, we can create your advertisement design from scratch. We'll start by building an understanding of your business and what you want to promote, and will review brand elements such as colours and imagery by referencing existing materials such as your website and/or brochures.

We'll then develop advertisement artwork that is in-keeping with your brand and will capture the attention of potential customers.

What will it cost?

We charge according to the time spent preparing your advertisement, and this will typically range between £320 and £960, depending on the scope of your instructions. Once we have had an initial discussion about your requirements, we will confirm a price before proceeding with the work.

Our portfolio

Over the following pages you can see examples of our advertisement design work.
